Solutions
Development

Module Code

IT5035FP

Duration

1 hour

Title:

Installation of SQL Server and SQL Server Management Studio.

Objective(s):

In this lab, students will learn to install SQL Server & SQL Server Management Studio (SSMS).
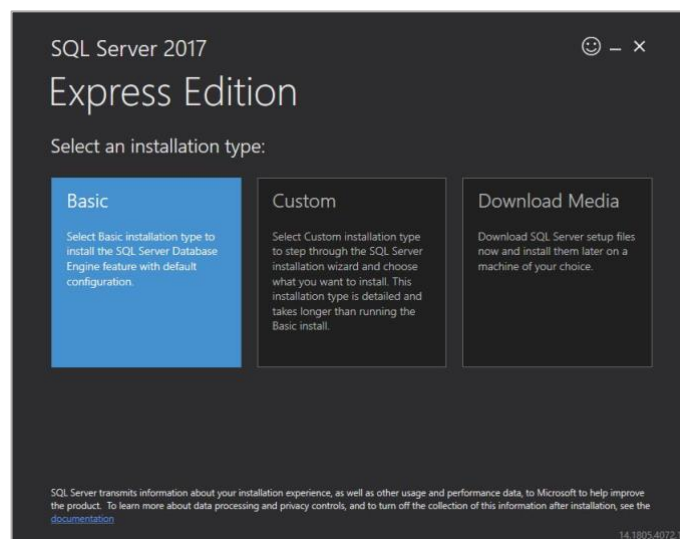

- Install and configure SQL Server
- Install and configure SQL Server Management Studio

Tools, Equipment and Materials:

1   Personal Computer with Internet access
2   SQL Server
3   SQL Server Management Studio (SSMS)

Instructions:

Part (A): Install and Configure SQL Server

1   Download **Microsoft SQL Server 2017 Express** installation file (i.e. SQLServer2017-SSEI-Expr.exe). Download instructions are available in MyConnexion.

2   Double-click on the downloaded file to launch the installation process.

3   When prompted to select an installation type, click **Basic**.

LABSHEET 5

4   Click **Accept** to accept the License Terms and Privacy Statement.

5   Leave the INSTALL LOCATION as default. Click **Install** to start the installation process.
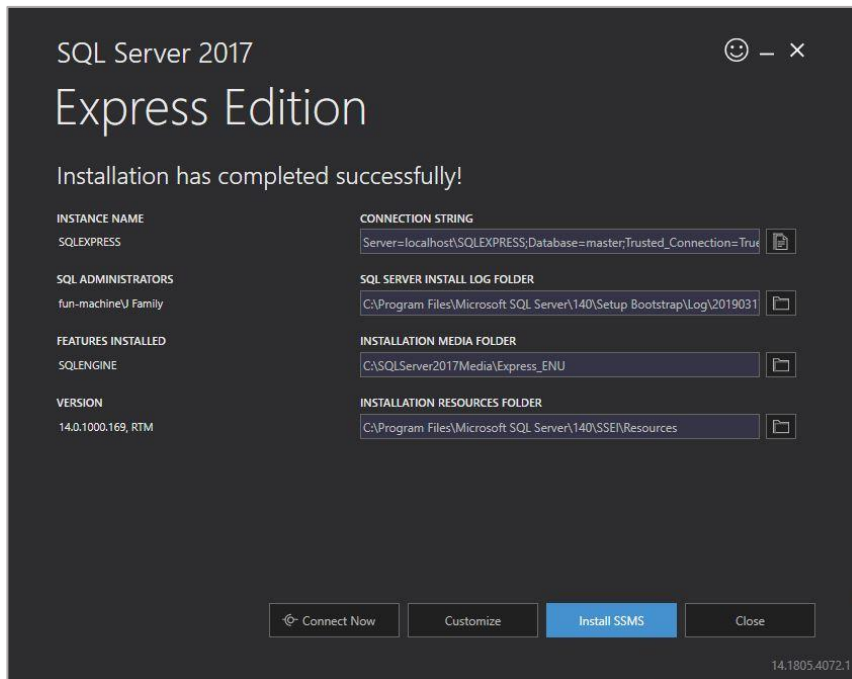

LABSHEET 5

Module: Web Solutions Development   Module Code: IT5035FP

6   When the installation has completed successfully, leave all settings (e.g. CONNECTION STRING, Folders) as default. Click **Close** to exit SQL Server.
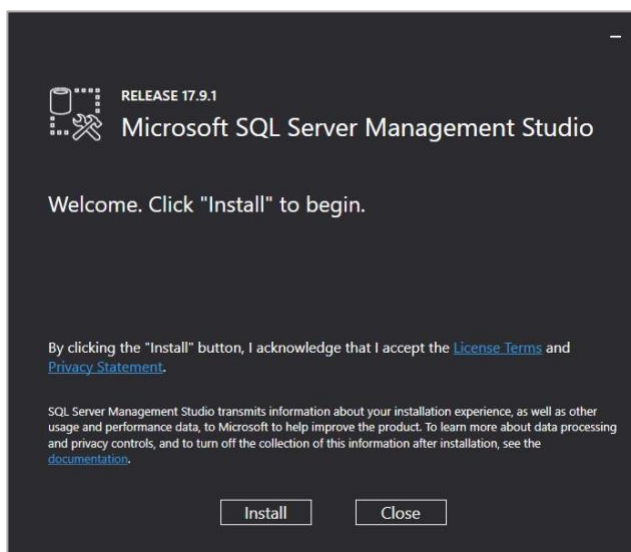

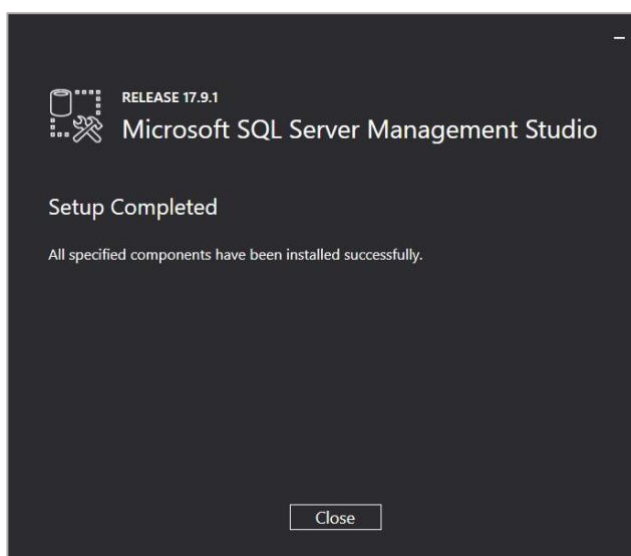

LABSHEET 5

Part (B): Install SQL Server Management Studio (SSMS)

1   Download **SSMS 17.9.1** installation file (i.e. SSMS-Setup-ENU.exe). Download instructions are available in MyConnexion.

2   Double-click on the downloaded file to launch the installation process.

3   Click **Install** to start the installation process.

4   When setup is completed, click **Close**.
